WORLD'S FINEST MINE SUPPORT EQUIPMENT

# GROUND FORCE WORLDWIDE TRAINING PROGRAMS

**On-Site Training:** This training allows for classroom style and hands-on training. This may be coupled with the installation and commissioning of your equipment.

**Online Training:** Our online training program utilizing the same in-depth content we provide on-site with our Senior Field Technician delivering the training and allows for ample Q&A.

**Train-the-Trainer:** These courses are designed to give your Trainer the ability to educate your operators on your schedule. This supports easy training of new operators.

Our Trainings utilize videos, workbooks and step-by-step presentation to allow for the best learning experience. We provide hard copy workbooks (when applicable) and digital copies of our Training Programs to use for review and to help ensure your team has all the tools they need to succeed!

**CLASSROOM**

**HANDS-ON**

## BOTH TRAININGS INCLUDE:

- Hazard Identification
