

MOBILE WATER PUMP

3,500 GPM / 13,249 LPM

Mobile Pumps provide fast, reliable water transfer for remote locations where access is limited and performance is critical. Designed for durability, mobility, and ease of operation, these units can be transported, positioned, and set up by a single operator, reducing labor requirements and minimizing downtime in the field.

Powered by a CAT® or Kubota® diesel engine, the system uses hydraulics to drive its axial-flow water pump, raise and lower intake and discharge piping, and control all operating functions. Delivering nominal flow rates of up to 3,500 gallons per minute, it can fill large tanks in just minutes, providing an efficient and dependable solution for water transfer and emergency response applications.

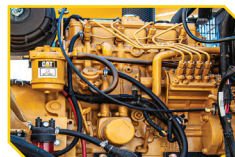

Built to withstand demanding job site conditions, the Mobile Pump combines rugged construction with simple, user-friendly controls to maximize productivity and reliability. Operators can quickly deploy it wherever water movement is needed, helping crews respond faster, work more efficiently, and keep critical operations running smoothly.

AVAILABLE MOBILE PUMP DIESEL ENGINES

CAT CATERPILLAR® DIESEL ENGINE

A Caterpillar® C2.2 Tier 4 diesel engine is also available, providing efficient power while meeting emissions standards.

Kubota KUBOTA® DIESEL ENGINE

Powered by a Kubota® 49.6 bhp Tier 4 diesel engine, the system delivers reliable performance while meeting emissions standards.

EQUIPMENT FEATURES

- ▲ 3,500 GPM / 13,249 LPM Flow Rate
- ▲ 50 Gallon Diesel Fuel Tank
- ▲ System Controls with Instrumentation
- ▲ Maintenance Free 12v Battery
- ▲ Battery Disconnect Switch
- ▲ Hydraulically-Driven Axial Flow Water Pump
- ▲ Pump Inlet Trash Screen
- ▲ 12 month Unlimited-Hour Warranty
- ▲ Hydraulic Tank with Filter & Level Gauge
- ▲ Eco-Friendly Hydraulic Oil
- ▲ Hydraulic Control Manifold with Test Ports
- ▲ Independent Adjustable Intake & Discharge Tubes
- ▲ Adjustable Height Setting Jacks
- ▲ Discharge Tube Stream Straightener & Discharge Sock
- ▲ Single Trailer Axle with Hub
- ▲ Hitch Assembly with 2 $\frac{5}{16}$ " Ball
- ▲ Folding Tongue for Loading Access
- ▲ Lifting Eyes
- ▲ Radial Tires with Full Fenders
- ▲ DOT Lighting & Reflectors
- ▲ Lockable Tool Storage Box
- ▲ Designed for Easy Installation & Operation

SERIOUS REACH

With a maximum lift of **25 ft. (7.6 meters)** and discharging at heights of up to **17 feet (5.2 meters)** above ground level.

FAST FILLS

With a nominal flow rate of up to **3,500 gallons per minute (13,249 liters per minute)**, the mobile pump can fill large tanks in just minutes, keeping operations moving and projects on schedule.

KEEPS DEBRIS OUT

The hydraulically driven axial flow water pump features a heavy-duty inlet screen that helps block debris and prevent unwanted material from entering the system.
